LAST MINUTE NEWS FLASH

VOL. 6, NO. 3 OCTOBER 10, 1944 SERIAL NUMBER 159

POLICE WARNED ON COIN MACHINES

NEWARK, N.J., Sept. 27 - Bergen County Prosecutor Winne warned municipal police chiefs today they cannot interfere with coin operated devices without proof that the machines are used for gambling.

Winne called attention to the ruling just handed down in the Court of Errors and Appeals in Trenton, N.J. (reported Sept. 26 issue of The Cash Box) which states that certain machines cannot be classified as "slot machines". These latter are illegal in New Jersey.

The Court of Errors and Appeals ruling affirmed Vice-Chancellor Bigelow's order restraining Public Safety Director Keenan of Newark, N.J. from confiscating baseball, hockey and bowling game devices.

Winne told the police chiefs at a meeting in his office that he believes the prosecutor and police should exercise no control unless gambling has been proven, in view of this decision. He also said that it was up to the individual municipalities to pass ordinances governing the licensing of such machines. Winne also stated that as far as he knew there were no gambling machines in Bergen County.

Coinmen in New Jersey report that some seem to have interpreted this ruling very broadly and are already placing pin games. The ruling was on such machines as Scientific's Batting Practice, and is supposed to be confined to similar type arcade games.

It is claimed by some coinmen that this decision is so broad that it may include the possibility of novelty type pin games being allowed in many communities in New Jersey. This would all depend upon local interpretation of this decision. Some coinmen also report much more friendly attitude from law enforcement agencies in their communities since this decision. Many expect novelty type pins may be seen in Newark after the coming elections. Others believe that pin games will be placed back all over the state.

BALLY ANNOUNCES POST-WAR PERSONNEL

CHICAGO, ILL., Sept. 22 - Officials of Lion Manufacturing Corp., producers of coin operated equipment marketed by Bally Mfg. Co., today released details on the organization which will direct speedy reconversion of the Bally plant to civilian products.

Ray Moloney, founder of the organization, continues as president and is actively engaged in directing post-war plans. Roy Guilfoyle is executive vice-president and general manager. Andy Renn is comptroller and assistant to Roy Guilfoyle.

Coin machine sales are under the direction of George Jenkins, vice-president and general manager of Bally Mfg. Co., and he is assisted by Clarence Gillett. Herb Jones, former advertising manager, is vice-president and works manager in direct charge of engineering and manufacturing, he will be assisted by Bill Billheimer, formerly purchasing agent. Bud Breitenstein, chief mechanical engineer, and Don Hooker, chief electrical engineer, are in charge of development and engineering. Ralph Nicholson, who developed the Bally Beverage Vender, is in charge of beverage dispensing engineering. Stuart Lyon, Vice-President, is in charge of contract accounts in the beverage dispensing division.

Replying to the many questions regarding Bally's announcement of its first post-war game, "Victory Derby", Ray Moloney stated, "I am sure no coin machine man would wish Bally to push post-war production at the expense of war production. However, our post-war plans are well advanced and we expect to be among the first to deliver new games."

SPENCE REESE LEAVES WURLITZER

NORTH TONAWANDA, N.Y., Sept. 27 - M. G. (Mike) Hammergren, Vice-President and General Sales Manager of The Rudolph Wurlitzer Company, this division, announced today with sincere regret the decision of Spence Reese, well known to all the nation's music men to leave the Company, effective October 1, 1944.

Hammergren stated, "As Spence Reese takes leave of our company, I am sure that all will join me in wishing him all possible success in his new ventures. Those of us who have had the opportunity to know Spence well are certain that he will continue to achieve the best in whatever direction his path may lead."

"The Coin Machines Merry-Go-'Round"

by Bill Gersh

INDUSTRY TO DRAW CLOSER TOGETHER

Many months ago The Cash Box predicted that this industry would become a closer, tighter, more highly concentrated unit, and that post-war transportation progress would have a great deal to do with this prediction. The men in this industry, because they now realize the value of closer relationship, would do the rest to help solidify this business as a unit.

The announcement, therefore, just two weeks ago by the leading cross-country airlines of the nation that sometime in June, 1945, they would receive the first four motored transport ships they had just purchased; airliners that would cruise at 250 miles per hour, and that would shorten the time gap between the coasts to less than 8 hours, verifies this prediction.

This means that the trade will be as easily and rapidly covered on the Pacific and the Atlantic coasts as it has formerly been covered by the manufacturers in their native Midwest.

It also means that by bringing machines to each coast more rapidly than ever before in the history of this trade, or the nation as well, that a great many problems which formerly irritated many of the men of this industry, especially the firms located along the coastlines, would be obliterated.

It has always been a well known fact that the Midwestern and Eastern dealers were able to get their machines anywhere from 10 days to three weeks earlier than the men on the West Coast. Therefore, machines were being taken in trade as "used" by the men in these sections, sometimes even before they had as yet arrived on the West Coast as "new" machines.

Tho the publications attempted to keep the news of these machines being offered as "used" out of their columns, it became rapidly apparent, as time went on, that this did not at all help the situation. In a great many instances dealers in the West found themselves in the awkward position of asking "new" machine prices, plus freight, when the trade knew that they could obtain the same equipment, if they so desired, at "used" prices in the East and Midwest.

The result was to naturally cut down a great many sales. This, because of speedier transportation (and the railroads are sure to follow the lead of the airlines and also announce faster delivery time) will be more or less completely wiped out and dealers will find themselves in a much better merchandising position than ever before in their history.

The effect of this speedier traveling in four motored giant planes up above all weather conditions will be to also bring news of the trade to the men thruout the nation faster than ever before. (The Cash Box recognized this fact and is using First Class mailing with many of its subscribers on Airmail. And with the possibility that after the war First Class Mail may become Airmail).

This means that the men are bound to come closer together whether they do or do not so desire. The effect of what speedy communication can accomplish is now well known to all this nation, because it has been so prominently brought forth during this war period. Speed in communication made possible a great many victories during this war which would otherwise have been slow, bloody, trench warfare like that of World War I.

Coming closer together as a more highly concentrated and perhaps solidified unit, brings greater possibilities for the continued growth and progress of this industry. A man in New York desiring to present a new product can be showing that product the same evening in San Francisco or Los Angeles as well as that very same afternoon in Chicago.

His salesmen will be able to cover more territory, faster than ever before, and thereby acquaint the entire nation, as a unit, with his new products. He will, overnight, be able to judge whether it will pay him to go into immediate large scale production by the reception his new product will receive, instead of starting slowly and waiting to hear from these same distributors after weeks have gone by.

"The Coin Machines Merry-Go-Round"

Even beyond all this is the fact that the high speed transportation progress being presented to post-war America by the airlines is only the beginning of an era when many new products will become the vogue in this industry to meet exactly such conditions as created by such progress.

There is no doubt that more and better airports will be seen thruout the country. Already certain noted engineering firms (as reported in The Cash Box sometime ago) plan to construct thousands of airports thruout the country. These will need the type of equipment that matches such progressive development.

Within a period of ten years from the day the wars in Europe and Asia end - there is no doubt that this industry will not even be recognizable to the man who worked so hard to maintain himself in it during this tragic wartime period.

He willprobably be seeing a highly developed automatic merchandising machines industry meeting with great national approval from outstanding manufacturers of a great many consumer products. The amusement division may reach the status of the motion pictures field for entertainment value. And as far as music equipment is concerned the revolutionary changes that will take place in this division of the trade are bound to bring outstanding international recognition.

PRODUCTION EXCITEMENT

Tho the leaders of this industry continue to hammer home the thought that full scale production is as yet many months away, many of the members of this trade have somehow convinced themselves that production is already here. They claim, do such men, that the manufacturers are all set and just awaiting the headlines which will proclaim the war in Europe at an end.

As is well known, and as was pointed out in this past week's issue of The Cash Box, all industries have become excited over the fact that WPB and WMC have made statements to the effect that they are ready to eliminate controls so that all manufacturers can again get started on V-E day.

Of course, both agencies remind the trades that they will not allow materials to go just helter-skelter. First, those manufacturers who will still be engaged in war production will receive their allotments. The left over, after that, will be given to the rest of the manufacturers. And there is no doubt that a mad scramble is bound to ensue for whatever materials will be available.

It is also a known fact that the War Department is prepared with many thousands of telegrams which will be released on V-E day and which will halt production in as many thousands of plants thruout the nation. There are already demands that such telegrams be released now to manufacturers so that these latter can prepare themselves to enter into post-war production and not lose the manpower which they have so painfully accumulated.

Because of a great many WPB, WMC and other news releases, and also because of the fact that much whispering is apparent thruout the industry, a large majority of this trade feel that the post-war production era is actually here. They are completely intent on waiting for new equipment and unless in absolute need will not buy even at the lowest of prices.

There are others in the trade who realize that regardless of production starting even tomorrow, it will be many, many months before they see machines in any volume. These men are continuing on ahead to do business with used equipment as they have in the past, and rightfully so.

MARKET REPORT

The first faint glimmerings of an upward trend in collections became discernible this past week. Reports coming thru from all over the nation show rises in collections of almost all types of equipment. Tho most of these rises range in the very low percentages as yet, the indication is that recovery is on the way and that possibly even before this month is over, collections may return to normal. This collections recovery has heartened a great many coinmen.

MUSIC

The music equipment field continues to prove itself among ths most staple in the industry, not only as far as collections are concerned, but also from a sales standpoint. Prices are holding up well in this field tho sales are not as great as they were some months back. There seems to be some hesitation on the part of many to purchase the higher priced equipment. Yet, likewise, there are many firms who are buying all the phonos that they can. Routes, tho, are changing hands with unprecedented speed. Many routes were reported sold this past month and heavy route selling is continuing this month as well.

"The Coin Machines Merry-Go-Round"

ARCADE

Arcade equipment has stepped down a bit. This field let go of only a small volume of equipment after Labor Day. The opposite was expected by most of the trade. But the fact remains that more and still more of the equipment now being offered for sale is showing a price decrease. The newer equipment is holding up in price and the belief is prevalent that this will remain the fact until new machines are produced in this field. The large number of arcades now operating thruout the country makes whatever is offered seem very small in comparison to what is actually needed in this division of the industry.

REVAMPS

Revamps are holding their own. Most of these have proven themselves just what was needed by the average coinman to continue to obtain higher income on his locations. There are very, very few good revamps being offered at reduced prices. The belief is that this will remain so until new games appear.

CONSOLES

The console field is jittery. Those who still have the latest models are demanding high prices. Others with just a handful of units are offering these at lowered prices in an effort to clear away. Generally, where consoles are operating the take is reported to be holding up. The average coinman is therefore not anxious to get rid of such equipment. The belief is that this field will see some of the grandest equipment produced in the post-war period. In the meantime the trade awaits to see what the result of all this jittery price action will be.

SLOTS

Slots, too, show some price jitteriness. In most cases the better units in this field are maintaining their higher prices. The older units are being sacrificed. Rebuilts are up and down. The general belief is that the slot machines field is capable of taking care of whatever is offered for sale. Most of the leading firms are upholding prices and feel that there will be no great downward trend even after manufacturing gets started again. They do not foresee any drastic price cuts.

ONE-BALLS

More One-Balls appeared on the market this past month than in many previous months. And, in addition, some of the very best equipment was presented for sale. Prices remained at high level. There is no general cutting down on prices in this field. The one-ball field is expected to remain stationary in view of the fact that there aren't enough of these machines around to effect the price situation. Unless the manufacturers start these on their production lines, the general belief of the coinmen in this division of the trade is that prices will fall somewhat, but not enough to cut back too much from present levels.

MERCHANDISERS

Merchandisers are hard hit. Here prices have tumbled to new lows in many cases. This is reported to be due to the fact that merchandise is becoming ever more difficult to obtain. The machines themselves sell out a large volume of merchandise these days. In fact, sales are better and faster than ever before. But many of the smaller coinmen in this field have sold off in view of the fact they cannot obtain sufficient merchandise and are therefore finding their operations unprofitable. The belief is that this situation will ease up some months after the war is over. The larger merchandise machine firms are continuing on ahead but are rationing their stocks to make them spread out as far as possible. These men are more optimistic than the smaller men in regards to return of more merchandise for their equipment. Yet, this is one field where optimism is greatest for post-war.

PIN GAMES

The pin game field is slowly cutting down its price level. More of the better numbers are appearing on the market. Tho the cut in price has been so gradual as to almost not be noticeable - it is still there- and this field will probably be among the very first to clear its decks for post-war action. Pin game men are going ahead. Many have taken full advantage of this slight price drop and are buying equipment in volume to cover locations they feel they will want when the war is over. This makes for greater action in this field than in any other. Business, because of this, continues on briskly. Perhaps slight cutbacks would create the same effect in all other divisions of the field. Those men now taking advantage of the lowering of some prices in this field are happy over the fact that they are able to cover many locations very cheaply.

CONCLUSION

In conclusion it can be stated that the present market is demonstrating a more or less price-jittery attitude all around. Newspaper stories as to rapid return of domestic production have somewhat affected sales. Poor collections during this past summer season have also had their effect. Unverified whispers as to manufacturers preparing to start production also hit hard. In general, tho, the market has really upheld itself beautifully considering all these surrounding factors. The belief is that the market will hold at this point until official announcements are forthcoming from the manufacturers as to exactly when a return to domestic production can be expected.

"TALKING OUT LOUD"

ALL EAGER TO SEE NEW POST-WAR EQUIPMENT

Growing Excitement Noted As All Look Forward To New Machines, No Rush To Change Present Machines On Routes. Believe First New Machines Will Be Take-Offs From Former Hits. Caution Seems To Be Watchword. Used Equipment And Route Buying Continues.

NEW YORK — Outstanding at this time, thruout the country, is the excitement prevailing wherever leading coinmen gather, all directed at seeing the new, post-war equipment which the manufacturers are expected to present as soon as the war in Europe is finished. The average man in this industry is eager to see whether his predictions as to just what this equipment will look like will be realized.

Tho many look forward to great changes in design, mechanism and play action, the greater majority are of the belief that the first new machines to be presented will be take-offs from former hits. These latter are of the belief that the manufacturers will best be able to get their new employees into productive action with machines they formerly manufactured for they still have enough of their older help to guide the new people in this sort of production.

With all this excitement charging the atmosphere it is surprising that there has been very little, if any, action to change present machines on routes now in operation. The general belief was to the effect that the average coinman would now begin to swing machines about in an effort to be prepared for whatever new equipment he expected to be produced. Instead machines remain on locations they formerly occupied and few have made any equipment changes. Furthermore, the average op. states that he will not make any changes until he is completely satisfied with the new machines that will be presented to him.

Great caution seems to be the rule among the older heads in the business. Whether operators, jobbers or distributors, few of these men will make any definite committments until they see the new equipment. Some of the old timers are even of the belief that the most cautious approach to new equipment may prove best. They claim that whatever machines are introduced at first will have to be thoroly tested prior to any large volume committments.

But, as is well known in this industry, these statements are always made and always broken immediately after new machines appear on the market. There is no doubt that regardless of how long these men have been in the business they will be among the very first to grab at the new machines to satisfy their location owners, who will howl loudly should a competitive storekeeper get the new machines before they do. And usually they are very right in their statements for the competitor pulls the crowd away from their spots and profits at their loss.

Most important, and with all this excitement spreading thruout the trade, is the fact that the sales of used equipment continue on in greater volume so far this Fall season than has been enjoyed the past month of the Summer. Leaders in this field report that they are selling more equipment and obtaining better prices than they did during the late summer season.

They also report that many are continuing to buy regardless of the fact that the post-war era seems to be so rapidly approaching. The general belief is now that used machine sales at present prices will continue on well after the first new machines have been presented.

VITAL MATERIALS MAY HOLD UP PRODUCTION

NEW YORK—Leading manufacturers in the consumers durable good fields report that there is the great possibility that vital raw materials may hold up a speedy return to former products production.

These men believe that zinc, copper, brass, rubber, wood, etc., etc., will prove difficult to obtain. They base their statements on the fact that those factories which will continue to do war work will need the lion's share of these materials and that the very essential consumer items, which will have second preference, will short the market considerably.

They are also of the belief that whatever is then left will work on a priority basis and that regardless of WPB's intentions to allow all manufacturers to get their hands on whatever is left over after these first two important factors have received their share, that some sort of rationing will have to come into being to assure the manufacturers of more important items a decent share of the remainder.

Should the above prove to be the case there is no doubt that a great many manufacturers will be held back from speedy reconversion and that the unemployment problem is liable to become extremely acute because of this.

This is not the intention of WPB or WMC for they are eager to have the factories take up the slack by rapid reconversion so that the possible 5,000,000 or so who will be unemployed for an undetermined period right after reconversion gets under way will rapidly be assimilated by other factories in new products production.

As yet no statement as to the above possible priority ruling has come from WPB aside from the fact that war materials manufacturers will be given priority after V-E day and that extremely essential consumers' goods will have second choice. The results will prove extremely interesting to this industry.

Thank You

NEW YORK — To all of you, everywhere in the nation, who complimented us on our Fall Special issue of The Cash Box, we simply want to say, "thank you".

The wires that arrived, the phone calls and the many letters of congratulation were more than worth the effort put forth by the entire staff of The Cash Box to bring you one of the most outstanding issues in the history of this industry.

DONATIONS OF EQUIPMENT BY L. A. OP. ASSN. PRAISED

LOS ANGELES, CALIF. — Samuel "Curley" Robinson, Director of the Los Angeles Operators Assn. has received any number of letters from the Armed Forces thanking the Association for their great thoughtfulness and fine spirit in donating equipmnt to their units. As pointed out by The Cash Box many times, these slight donations create a deep feeling of thankfulness and appreciation from the men who are to be the future leaders of the country. Coinmen thruout the country should make it their business to follow the splendid example of "Curley" and give up a few pieces of equipment to whatever service or hospital unit in their territory that can use them.

A letter to "Curley" from S/Sgt. Jerry F. Ramlow, Public Relations Office, Hq., Ninth Service Command, Fort Douglas, Utah, includes such commendation as "I want to let you know that the Association's efforts to aid in morale building programs by providing recreational equipment to servicemen's organizations and athletic groups at military installations is more than greatly appreciated by all concerned" . . . "will realize considerable satisfaction in knowing that each and every fulfillment of such requests definitely has changed many dull moments to pleasureable ones for servicemen, especially those stationed overseas" . . . has contributed greatly to the success of many a Special Service officer's morale building program is worthy of praise and commendation."

A letter from A. E. Thomas, Lieut. Comdr. USNR, commanding officer, Carrier Aircraft Unit Fifty-Two, United States Pacific Fleet, reads in part "Your thoughtful gift is indicative of your consideration and spirit which prompted this kind gesture. It is felt that many hours of relaxation and amusment will be attained by your kindness."

A letter from Helen B. Ralston, Sec'y, Board of Directors, Tri-Cities Service Men's Hospitality Center, Maywood, Calif. contains this sentence, "The service men enjoy it (Pin Game) as much it not more than anything we have there."

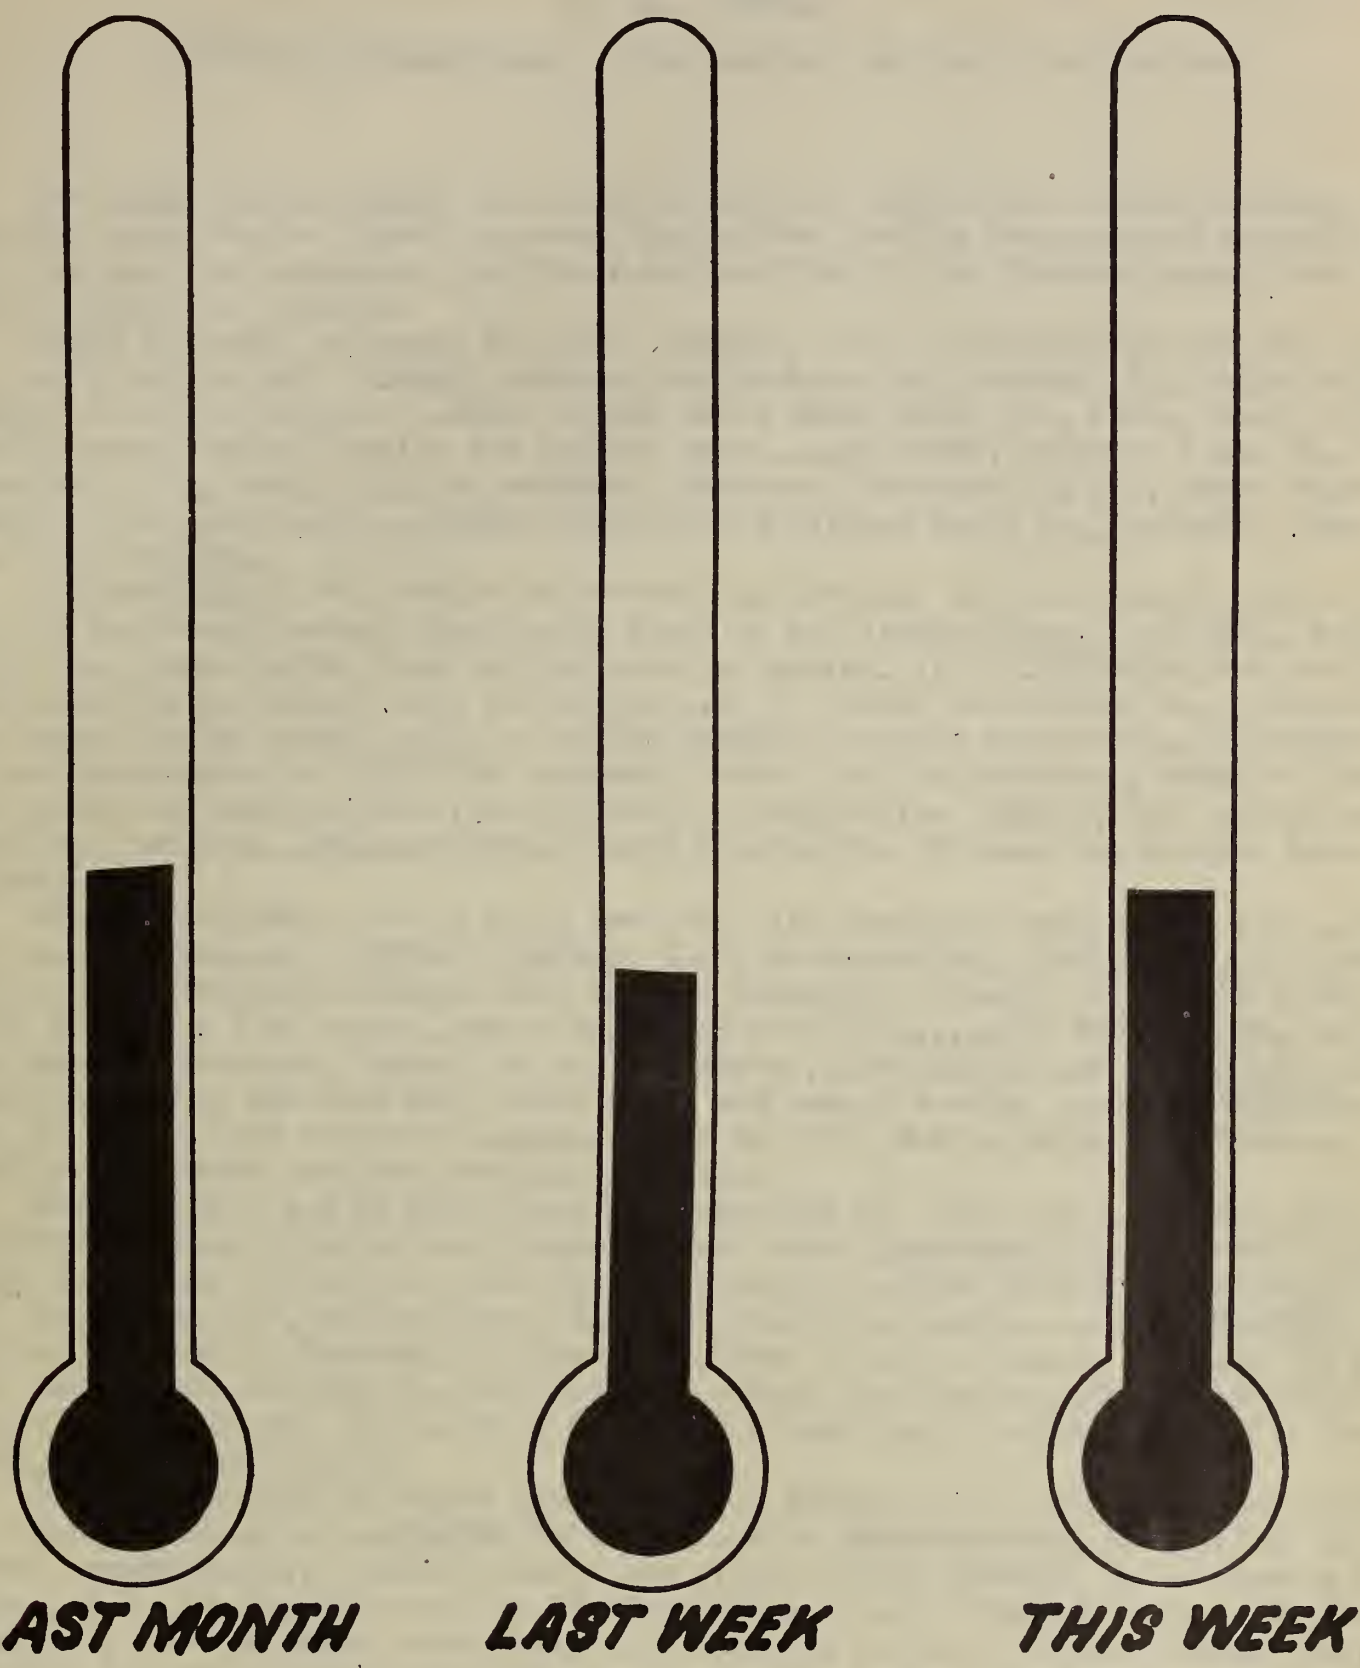
A bouquet to the Los Angeles Operators Ass'n and we hope many other coinmen will follow their lead.

LONDON UP ON "LONDON'S FOLLY"

LEW LONDON OF LEADER SALES CO., READING, PA. UP ON HIS FAMED BLUE RIBBON SHOW HORSE "LONDON'S FOLLY", WHO WON ITS 11th CHAMPIONSHIP IN 11 SHOW APPEARANCES AT THE GRAND CHAMPIONSHIP SHOW, DEVONS, PA. ON SEPT. 16.

BUSINESS INDEX OF THE WEEK

A 1944 Copyrighted Feature of: The Cash Box, 381 Fourth Avenue, New York (16)



As predicted this past week, collections continue to rise thruout the nation, and the Fall season of '44 seems to have started with assurance that coinmen will enjoy better collections than they have for some months past. The average collections rise thruout the nation, all equipment included, was better than 8%. This is double the amount of last week's collections average rise.

Also interesting is the fact that music equipment continues to lead in the upward swing. In some cases increases of better than 20% and 25% for music have been reported this past week. Many stated that they believe with the return of the public from resorts that music equipment will continue rising until averages are higher than they were even last Fall season. Some music men believe that with victory assured in Europe that greater play can be expected.

The amusement machines field, pin games, consoles, slots, arcade equipment, etc., also reported good increases. Some territories as yet just recovering from their Summer slump, but in the majority were the reports that upswing most noticeable in all collections this past week with the South and Far West leading the parade. The East, too, showed good, healthy collection increases on amusement machines. As yet the Midwest seems to be slower than these other territories in recovery.

Merchandising and service equipment still low. Average merchandising machine operator reports that collections are down and no change noticeable. Claim continues to be lack of merchandise. Cigarette machine operators are most affected by this lack of merchandise. Situation is reported becoming more serious each week with some of these men worried over the future.

★ *HOW ZINGO PLAYS —*

★ Ball is shot up runway of slanting playfield — into top scoring pocket — number 1 light goes out, 10,000 is counted up — 1000 at a time — 10 individual counts showing on the all visible, colorful light box glass — then, WHAM — the ball releases from this pocket, zig-zagging on it's way to another pocket — this time a 5000 channel — 1, 2, 3, 4, 5 thousand — WHAM — the ball releases again almost into the "spot a number" pocket, almost into the Free Ball pocket. Yes, Zingo has plenty of action!

** Zingo is terrific for "closed" territory, as well as "open" territory!*

BUT WE'VE THOUGHT IT OUT!

Postwar prosperity will depend upon the rapid resumption of peacetime production and services. Although our plant is engaged in war work, our engineers and designers are planning for postwar. We're not talking now, but we assure you the postwar A.B.T. coin-operated machines and other products will be comparable to any others and superior to most in the industry. After "V DAY", we'll unbutton our lips and you'll know what goes on behind the closed doors of A.B.T. BUT . . . our doors are open to you now if your machines need parts or servicing or if we can assist you in your postwar planning.

THE CONFIDENTIAL PRICE LISTS

AN EXCLUSIVE MERCHANDISING SERVICE FOR THE COIN MACHINES INDUSTRY ISSUED EVERY OTHER WEEK BY: THE CASH BOX, 381 FOURTH AVENUE, NEW YORK 16, N. Y.

FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for the past two weeks, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth $150.00 whereas someone on the East Coast may think it worth but $75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

METHOD

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the two week period: Where only one price appears this should be considered lowest price.

CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.
3. MEANS MACHINE JUST ADDED TO LIST.
4. MEANS PRICES WENT UP AND DOWN DURING THE PAST TWO WEEKS
5. MEANS PRICES REMAINED SAME AS IN LAST PRICE LISTS.
6. MEANS NO PRICES QUOTED FOR PAST FOUR WEEKS
7. MEANS NO PRICES QUOTED FOR PAST SIX WEEKS
8. MEANS NO PRICES QUOTED FOR PAST EIGHT WEEKS OR LONGER

IMPORTANT

Machines underlined mean these were most active in trading these past two weeks.

NOTICE ! March, 1942. Market Prices for Wholesalers as per GMPR of OPA appeared in September 7, 1943 issue. Reprints are available.
